Notes and Comments	<p>CATEGORY 23 (Metropolitan Area Network Ethernet): Comcast Ethernet Private Line (EPL) Service is a reliable, more flexible, higher bandwidth alternative to traditional TDM Private Lines. The service enables customers to connect their Customer Premises Equipment (CPE) using a lower cost Ethernet interface. EPL enables customers to use any VLANs or Ethernet control protocol across the service without coordination with Comcast. EPL provides one Ethernet Virtual Connection (EVC) between two customer locations. Comcast Ethernet transport services offer three Classes of Service (CoS): Basic, Priority, and Premium. CoS options enable customers to select the CoS that best meets their applications' performance requirements. The service is offered with 10Mbps, 100Mbps, 1Gbps or 10Gbps Ethernet User-to-Network Interfaces (UNI) and is available in speed increments from 1Mbps to 10Gbps.</p> <p>CATEGORY 24 (Flat Rate Internet Services): Comcast's Ethernet Dedicated Internet (EDI) Service provides a reliable, flexible, and higher bandwidth options than T1 or SONET-based dedicated Internet access services. The service provides an Ethernet Virtual Connection (EVC) from the customer premises location to a Comcast Internet Point of Presence (POP) router. The service provides bidirectional, full duplex transmission of Ethernet frames using a standard IEEE 802.3 Ethernet interface.</p> <p>CATEGORY 30 (Broadband with Internet Service): Comcast's Broadband Internet Service offers broadband internet services over DOCSIS-based coaxial networks with a managed modem where Comcast owns and manages the modem. The modem at the customer site is connected to the internet using a broadband circuit. Broadband internet provides downloads up to 1Gbps and uploads up to 35Mbps.</p>

BOE	911 Fee (State)	\$0.30/ Access Line / Month	https://www.boe.ca.gov/legdiv/pdf/4-5Ab1717Cleanup.pdf	Last Revised 2017	The emergency telephone users surcharge, also known as the 9-1-1 surcharge, is a surcharge generally collected on a customer's monthly telephone bill on charges for certain intrastate telecommunication services that the customer (service user) received from a service supplier. The 911 surcharge funds collected help make emergency telephone service available to persons in this state by supporting the costs of installing, administering and supplying communication services for the "9-1-1" emergency telephone number system.	Y
BOE	988 Fees	\$0.08/ Access Line / Month	https://www.cdtfa.ca.gov/formspubs/L880.pdf	Last revised Jan 2023	Beginning January 1, 2023, telecommunication service suppliers and sellers of prepaid mobile telephony services (MTS) are responsible for collecting, reporting, and paying the new 988 surcharge imposed on the following: • Each access line for the month or partial month a service user subscribes with a service supplier. • Each retail purchase of prepaid MTS in California. This new surcharge does not affect the Local Prepaid Mobile Telephony Services Collection Act. Sellers will continue to report local charges on the Prepaid MTS Return.	Y
CPUC	California Public Purpose Program	\$1.11 per access line per month	https://leginfo.ca.gov/faces/codes_displaySection.xhtml?sectionNum=285.&nodeTreePath=2.1.2&lawCode=PUC	Last Revised Apr 2023	This flat rate fund adopts a new surcharge mechanism to fund California's Universal Service Public Purpose Programs (PPPs). The new mechanism assesses surcharges based on the number of active access lines that a telephone corporation operates in California.1 This decision defines "access line." Instead of the current system of an individual surcharge line item for each of the six PPPs, a customer's bill will now show a single consolidated surcharge amount for the six PPPs (ULTS, DDTP, CHCF-A, CHCF-B, CTF, and CASF).
