Notes and Comments	<p>CATEGORY 23 (Metropolitan Area Network Ethernet): Comcast Ethernet Private Line (EPL) Service is a reliable, more flexible, higher bandwidth alternative to traditional TDM Private Lines. The service enables customers to connect their Customer Premises Equipment (CPE) using a lower cost Ethernet interface. EPL enables customers to use any VLANs or Ethernet control protocol across the service without coordination with Comcast. EPL provides one Ethernet Virtual Connection (EVC) between two customer locations. Comcast Ethernet transport services offer three Classes of Service (CoS): Basic, Priority, and Premium. CoS options enable customers to select the CoS that best meets their applications' performance requirements. The service is offered with 10Mbps, 100Mbps, 1Gbps or 10Gbps Ethernet User-to-Network Interfaces (UNI) and is available in speed increments from 1Mbps to 10Gbps.</p> <p>CATEGORY 24 (Flat Rate Internet Services): Comcast's Ethernet Dedicated Internet (EDI) Service provides a reliable, flexible, and higher bandwidth options than T1 or SONET-based dedicated Internet access services. The service provides an Ethernet Virtual Connection (EVC) from the customer premises location to a Comcast Internet Point of Presence (POP) router. The service provides bidirectional, full duplex transmission of Ethernet frames using a standard IEEE 802.3 Ethernet interface.</p> <p>CATEGORY 30 (Broadband with Internet Service): Comcast's Broadband Internet Service offers broadband internet services over DOCSIS-based coaxial networks with a managed modem where Comcast owns and manages the modem. The modem at the customer site is connected to the internet using a broadband circuit. Broadband internet provides downloads up to 1Gbps and uploads up to 35Mbps.</p>

Varies by jurisdiction	911 Fee (County or City)	Varies by jurisdiction. Up to \$3.80/ Access Line / Month	Varies by jurisdiction	Varies by jurisdiction	Provides funding for the operation of 911 emergency telecommunications services in your area. Emergency personnel must have the capability to identify the location of a caller when they dial 911. The fee, which is applied per access line, funds communications systems that support emergency and quick response police, fire and ambulance services with identification of phone number and location. Customers pay for this service and other 911 communication costs through state and county 911 surcharges. Not all counties have the 911 system yet, but may collect for future implementation.	Y
FCC	Federal Universal Service Fund	Approximately 33.00% of applicable charges	https://transition.fcc.gov/Reports/tcom1996.pdf	Last revised July 2022	<ul style="list-style-type: none"> -Promote the availability of quality services at just, reasonable and affordable rates for all consumers -Increase nationwide access to advanced telecommunications services -Advance the availability of such services to all consumers, including those in low income, rural, insular, and high cost areas, at rates that are reasonably comparable to those charged in urban areas -Increase access to telecommunications and advanced services in schools, libraries and rural health care facilities -Provide equitable and non-discriminatory contributions from all providers of telecommunications services for the fund supporting universal service programs 	N
FCC	Federal Cost Recovery Fee (TRS / IPCTS)	Approximately 1.40% of applicable charges (Excluding Mobile Services)		Last revised APR 2022	The Federal Cost Recovery Charge covers Comcast's contribution to support the operation of the Federal Communications Commission (FCC) and programs that make phone service accessible to individuals with certain disabilities	N
